Klavipro

KLAVI PRO

KLAVI Pro is a Professional Class Piano module designed for musicians who regard the 'Piano' as the fundamental sound for their studio projects and performances.

KLAVI Pro may be small in size, but delivers an innovative, high quality Stereo Grand Piano sound. This is achieved by meticulous, multi level samples that are captured note by note from one of the finest Concert Grand Piano's in existence.

The result is quite simply remarkable. The Grand Piano samples perfectly reproduce the warmth and natural resonance of the piano strings, something never before achieved in product of this nature, size and price!

KLAVI Pro features 2 Grand Pianos and 2 Electric pianos with multi layered samples & articulations, 2 FM pianos plus several electric and acoustic patches.

The KLAVI Pro sound module can be easily controlled by any Midi capable Master Keyboard, Digital Piano or Personal keyboard.

Incredible sound quality coupled with true voice characteristics (due to KETRON'S new Voice Character Emulation or 'VCE'), mean the KLAVI Pro can become part of your professional music studio set up in place of expensive and complicated software or virtual instruments!
